mantra<sup>7000</sup> is a dynamic cruiser/racer designed for fast sailing in coastal waters. Her outstanding performance is confirmed by national and European Championship titles. Tall fractional rig and high aspect ratio keel with bulb give a high performance upwind. Large asymmetrical spinnaker combined with powerful hull shape allow her to go even faster while planning downwind. Large, open cockpit, simple rigging without backstay or runners make her easy to handle. Interior with gas stove, sink and chemical head can easily accommodate four persons in full length berths. Low beam, weight and easily disconnecting keel allow the boat to sit low in the trailer for road transport. The boat is designed to the highest standards resulting in a fast and durable yacht that is easy to operate.
